

# FIXED FIBERGLASS SLEEVES

## SPECIFICATION

### Description

Fixed fiberglass sleeves are comprised of fiberglass sleeve coated with heat resistant lacquer.

### Properties

The fixed fiberglass sleeve is flexible, colored black or white. These products are highly flexible. The surface is smooth, non-adhesive and allows easy mounting. The fiberglass yarn ensures very good mechanical properties at high temperatures up to 300 °C.

### Application

Main field of application – electric-, heat- and mechanical insulation in the manufacture and repair of electric motors, transformers, electric welding units, electric machines, lighting fittings and household electrical appliances.

### Delivery format

Color: black or white

Packaging: Cardboard spool with variable length depending on the size of the sleeves – 200m or 100m.
